

Alaska Responsible Fisheries Management (RFM) Monitoring Of Continued Alignment

The **Alaska Responsible Fisheries Management (RFM)** Standard version 1.3 (effective 1 January 2016) obtained GSSI recognition on 12 July 2016 against Section A (Governance), Section B (Operational Management) and D (Fisheries) of the GSSI Global Benchmark Tool.

In March 2019, GSSI's Monitoring of Continued Alignment (MOCA) procedure began which comprises a review of any changes in the Scheme's ownership, management or the standard itself. The Independent Experts found the standard version 1.3 continues to be in alignment with all GSSI Essential Components for the Benchmarked sections and the Benchmark Committee recommended continued recognition, a decision that was approved by the GSSI Steering Board.

ABOUT THE MOCA PROCESS

The GSSI Monitoring of Continued Alignment (MOCA) process is carried out on a three-year cycle (alternating with the full re-assessment). It starts with a self-assessment by the Scheme Owner, followed by a report to GSSI indicating any changes in the Scheme Ownership, Scheme Management or the Standard itself. With the report, the Independent Experts (IEs) conduct a Desktop Review to provide a recommendation on the continued alignment of the scheme. During the MOCA process, the IEs focus on two main parts to conclude whether the scheme continues to be in alignment with the GSSI Benchmark Tool and can maintain its recognition:

- A. Identification of substantive changes in the reference documents since the recognition to determine if the scheme is still in alignment with all Essential Components of the Benchmark Tool.
- B. Verification of continued evidence of implementation.

The recommendation by the IEs is presented to the members of the Benchmark Committee (BC) for review. Following review by the Benchmark Committee, a notification is sent to the Board and a public announcement is made.

ABOUT THE GSSI BENCHMARKING PROCESS

GSSI's [Global Benchmark Tool](#) provides formal recognition of seafood certification schemes that successfully complete a rigorous and transparent benchmark process, underpinned by the FAO Guidelines. The Tool's [7-step Benchmark Process](#) is voluntary and designed to be independent, impartial and transparent. The expert-led process involves objective assessments made against performance areas covering scheme governance, operational management (including chain of custody) and standards for aquaculture and fisheries certification. Once a scheme has gone through the Benchmark Process and is found in alignment with the 186 Essential Components, it will be publicly recognized by GSSI and the Benchmark Report will be made available on the GSSI website: www.ourgssi.org.

ABOUT THE ALASKA RESPONSIBLE FISHERIES MANAGEMENT (RFM) CERTIFICATION PROGRAM

The Alaska Seafood Marketing Institute (ASMI) developed the Responsible Fisheries Management program in 2010 to offer seafood buyers and sellers a credible, cost-effective choice in seafood certification. The aim of the program was to deliver a voluntary, internationally accredited, third-party certification of Responsible Fisheries Management based on existing and widely accepted fisheries management models and guidance documents of the Food and Agriculture Organization of the United Nations. RFM is committed to an open, transparent, collaborative process with a sound governance structure and expert advisory committees.
